Confidence / limitations

Recorded confidence

analytics_included	yes
an2_finding_count	0
adjudication_decision_count	0

Limitations

- This report restates recorded CNAS data. It does not assert guilt, ownership, or identity beyond stored records.
- Empty sections mean no matching records were found in the current CNAS datasets.
- Analytics scores are existing rule-based outputs, not investigator conclusions.
- AN-2 identifier recurrence is included only when unstructured FIR records are in scope.
- No unstructured FIR records were available, so AN-2 findings were not generated.
- No adjudication decisions referenced the selected people or identifiers.
